Career Objective

Full Stack Developer with hands-on backend experience in Java, Spring Boot, REST API design, and microservice architecture, along with front-end experience in React and Next.js. Currently building a full-stack land management system using Spring Boot, Spring Security, JPA/Hibernate, PostgreSQL, Docker, React and Next.js. Strong foundation in Data Structures and Algorithms, demonstrated through solving 900+ problems across competitive programming platforms.

Experience

Full Stack Developer (One Direction Companies Limited) *Mar 2026 – Present*

- Developing **Shimana**, a full-stack land record and management platform built on a Java Spring Boot microservice architecture
- Designing and implementing secure RESTful APIs with Spring Security (JWT-based authentication and authorization) and Spring Data JPA/Hibernate for PostgreSQL persistence
- Containerizing backend services with Docker to ensure consistent local development and deployment environments

Mobile Application Developer (Software Lighthouse) *Dec 2025 – Feb 2026*

- Built a cross-platform mobile application using Flutter and Dart with RESTful API integration
- Focused on clean, maintainable code architecture, responsive UI/UX, and state management for a smooth user experience

Skills

Languages: Java, C, C++, Dart, Go

Backend Development: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST API, Microservices

Frontend Development: React, Next.js, JavaScript, HTML, CSS

Mobile Development: Flutter, Dart

Database: PostgreSQL, MySQL, SQL Server

Tools & Platforms: Docker, Git, GitHub, Maven, Postman, VS Code, Antigravity, Intellij IDEA

Personal Projects

TutorialsNinja Test Automation (POM Framework) *Selenium, Java, TestNG*

- Implemented a maintainable Page Object Model (POM) test framework using Selenium WebDriver, Java, TestNG and Maven to validate registration, login and core e-commerce flows

  GitHub: tutorials-ninja-automation-java-pom

Bank Management System *Java Swing, AWT*

- Developed a desktop-based banking application with account creation, balance management, deposit/withdraw operations, and transaction tracking, using MySQL for secure data storage

Online E-Learning Platform *HTML, CSS, PHP*

- Developed an online e-learning platform with user registration, course listing, content access, and progress tracking, using a responsive interface

Online Judge Profiles

- **Codeforces:** Solved 465 problems, Max Rating 1188 – codeforces.com/profile/Nasir
- **CodeChef:** Solved 59 problems, Max Rating 1444 (2 star) – codechef.com/users/nasir_cste
- **LeetCode:** Solved 189 problems – leetcode.com/u/nasircste15
- **GeeksforGeeks:** Solved 104 problems – geeksforgeeks.org/user/nasircste15
- Also solved problems on LightOJ, SPOJ, CSES, and HackerRank – 900+ problems in total, with participation in 50+ online and onsite programming contests

Achievements

- **9th Place** in Intra NSTU Programming Contest 2021
- **14th Place** in CUSS Presents IT Fiesta 2024 Inter University Programming Contest
- **624th Place** in ICPC Preliminary Dhaka Site 2024

Education

Noakhali Science and Technology University *2020 – 2025*
B.Sc. (Engg.) in Computer Science and Telecommunication Engineering

- CGPA: 3.59 / 4.00

Tangail College *2019*
Higher Secondary Certificate

- GPA: 4.67 / 5.00

Karimun-Nesa Siddique High School *2017*
Secondary School Certificate

- GPA: 4.68 / 5.00

Research

Thesis: Enhancing Email Security: A Multi-Layered Machine Learning Model for Detecting Spam and Mitigating Email Bombing Attacks

- Built dataset using Python & SMTP simulations to study subscription email bombing attacks
- Designed a multi-layered detection model (time-based filter, sender-domain classifier, ML model) with high precision and minimal false positives

Languages

Bangla: Native | **English:** Professional Proficiency
